What is NippleTips?

NippleTips (NPT) is a bold meme token built on Polygon that leverages the power of crypto & community to support breast health and education.

Our mission:

To leverage viral crypto culture to create real-world impact that funds education, raises awareness, and supports research into harmful chemicals in everyday products that affect breast health.

Why NippleTips?

Because the internet. And because no one remembers "UtilityChain ProToken v2."

NippleTips (NPT) gets attention. We use that attention to make a difference by:

- Promoting breast health and education
- Funding critical research
- Building a long-term, engaged community
- Showing Web3 can be weird, good, and actually useful

We take the cause seriously, *not ourselves*.

How does it work?

NPT is more than a token. It's a system designed to amplify awareness, reward believers, and fund a mission.

- Buy NPT during the presale using USDC or POL
- Stake tokens from each round & earn a share of unsold NPT
- Or Claim your tokens immediately after purchase
- Either way, support breast health initiatives while joining a one-of-a-kind community

The earlier you join, the more you benefit, but every round supports the cause.

*A meme token with real purpose,
supporting breast health and education
through crypto & community.*

ATTENTION:

**YOU CAN MAKE MULTIPLE PURCHASES, STAKES, AND CLAIMS
PER ROUND. WEIGHTED REWARDS ASSIGNED BY ROUND.**

Read the following sections for more details.

Tokenomics

Total Supply = 8,008,580,085 NPT

6 Presale Rounds of	Total Presale 60% = 4805148051 NPT Each Round =
10%	800,858,008.5
Marketing	10% 800,858,008.5
Team	10% 800,858,008.5
The Cause	10% 800,858,008.5
Liquidity	10% 800,858,008.5
*Cause Tax After Presale	
BUY/SELL	0.80085%

AFTER PRESALE ENDS:

BOOBS TAX: 0.80085% on DEX buys/sells

- Automatically routed to the Cause Wallet
- Transparent & verifiable
- Ensures project longevity

Presale & Staking

- 6 Presale rounds. Last round ends 09-30-2025 23:59:59 UTC
- Each round releases 10% of the Total Supply = 800,858,008.5 NPT (spells "BOOBSBOOBS")
- 4,805,148,051 NPT across all 6 rounds
- NPT token price will start at US \$0.001 and increase by US \$0.0002 each presale round
- Users can Claim their tokens or Stake them for their share of weighted rewards

After all 6 Presale rounds end:

- Unsold tokens go to Stakers on Oct. 31st, 2025, proportionally based on the weighted rewards scale
- Earlier rounds = bigger staking weight (see How Weighted Rewards Work below)

ATTENTION:

You can make multiple purchases per round.

You can Claim multiple times per round.

You can Stake multiple times per round.

You can also do partial Claims & Stakes if desired.

Continued on next page

Example:

1. John purchases 10,000 NPT in Round 1. He can claim and/or stake as little as 20% and up to 100% of purchased NPT anytime before October 1st, 2025. However, if he doesn't create a stake until Round 3, he will receive weighted rewards for staking in Round 3, even though the tokens were purchased in Round 1. Additionally, if he doesn't decide until after October, 1st 2025, he will no longer be able to stake them. He will only be able to claim any remaining tokens.

ATTENTION:

IF YOU PLAN TO STAKE IN ROUND 6, YOU MUST CREATE THE STAKE BEFORE THE ROUND ENDS AT 23:59PM UTC ON SEPT 30, 2025. AFTER THAT TIME, YOU WILL NOT BE ABLE TO STAKE THE TOKENS. YOU WILL ONLY BE ABLE TO CLAIM THEM.

Weighted Rewards

When you stake your NPT from the presale, you're eligible to earn a share of any unsold tokens and your share is boosted depending on which round you staked in. The earlier you buy and stake, the bigger your share of the bonus!

ROUND	NPT PRICE IN USD	REWARD WEIGHT
1	0.0010	6×
2	0.0012	5×
3	0.0014	4×
4	0.0016	3×
5	0.0018	2×
6	0.0020	1×

- If you purchase NPT in Round 1 and stake it in Round 1, your reward weight is 6×
- If you purchase NPT in Round 6 and stake it in Round 6, your reward weight is 1×
- That means your Round 1 purchase earns 6× more of the bonus token pool than your Round 6 purchase.
- However, if you purchase in Round 1 and stake in Round 6, your reward weight is 1×

Let's do the Maths

If a User Stakes 1,000 NPT Each Round

- Round 1: $1,000 \text{ NPT} \times 6 \times \text{weight} = 6,000$
- Round 2: $1,000 \text{ NPT} \times 5 \times \text{weight} = 5,000$
- Round 3: $1,000 \text{ NPT} \times 4 \times \text{weight} = 4,000$
- Round 4: $1,000 \text{ NPT} \times 3 \times \text{weight} = 3,000$
- Round 5: $1,000 \text{ NPT} \times 2 \times \text{weight} = 2,000$
- Round 6: $1,000 \text{ NPT} \times 1 \times \text{weight} = 1,000$

UserWeighted =

$$6000 + 5000 + 4000 + 3000 + 2000 + 1000 = 21,000$$

Assuming Global Stake Totals Per Round:

- Round 1 Total: $100,000 \text{ NPT} \times 6 = 600,000$
- Round 2 Total: $120,000 \text{ NPT} \times 5 = 600,000$
- Round 3 Total: $200,000 \text{ NPT} \times 4 = 800,000$
- Round 4 Total: $250,000 \text{ NPT} \times 3 = 750,000$
- Round 5 Total: $300,000 \text{ NPT} \times 2 = 600,000$
- Round 6 Total: $500,000 \text{ NPT} \times 1 = 500,000$

Global Weighted Total =

$$600,000 + 600,000 + 800,000 + 750,000 + 600,000 + 500,000 \\ = 3,850,000$$

User's Reward Share %

$$(21,000 / 3,850,000) \times 100 = 0.5455\%$$
